UMAR TANWAR

Software Developer | Flutter Developer

Jaipur, India · umartanwar027@gmail.com · linkedin.com/in/umartanwar · github.com/UmarTanwar3527

PROFESSIONAL SUMMARY

Software Developer specializing in Flutter and Dart, with professional experience building and maintaining cross-platform mobile applications. Experienced in REST API integration, Firebase, Supabase, WebSockets, debugging, performance improvements, responsive UI, and production feature development. Strong foundation in data structures, algorithms, databases, and software development.

TECHNICAL SKILLS

Languages	Dart, Python, Java, C++, JavaScript, SQL, HTML, CSS
Development	Flutter, Material Design, Cross-Platform Development, Responsive UI, UI/UX, Widget Tree, State Management (Bloc, Provider)
Backend & APIs	REST APIs, WebSockets, FastAPI, Flask, Django, Firebase, Firebase Authentication, Supabase
Databases	PostgreSQL, MySQL, SQLite, Hive
Tools	Git, GitHub, Netlify, Vercel, AWS, Flutter DevTools
AI & ML	scikit-learn, TensorFlow / Keras, NLP, Pandas, NumPy, Streamlit

PROFESSIONAL EXPERIENCE

Flutter Developer — Emizen Tech, Jaipur

July 2025 – Present

- **Archon Golf — Club Tournaments:** Developed and maintained a production Flutter application for private golf clubs and real-world tournaments, supporting club members, managers, tournament managers, and players.
- Implemented tournament workflows including registrations, flights and pairings, scorecards, leaderboards, tournament status, club chat, and player-facing tournament experiences.
- Integrated and debugged REST APIs and backend services for tournament data, score entry, handicaps, leaderboards, player management, and real-time tournament information.
- Worked on golf-specific scoring and tournament features including course/playing handicaps, scorecard workflows, tie-breaking methods, player ordering, and Pace of Play (POP) information.
- Implemented and maintained real-time and device-integration features including WebSockets, Chromecast casting, and AirPlay-related functionality.
- Diagnosed production issues, improved application reliability and UX, and collaborated on backend/API changes to support evolving tournament and club-management requirements.

Computer Science Expert — Chegg India, Remote

April 2024 – June 2025

- Provided detailed solutions to computer science and programming problems.
- Applied analytical and problem-solving skills to explain complex technical concepts clearly.

Machine Learning & Data Science Trainee — PIET

June 2022 – August 2022

- Gained practical experience with Python, machine learning algorithms, and Natural Language Processing.
- Developed 14+ projects demonstrating practical applications of data science and machine learning.

SELECTED PROJECTS

Rove — Shared E-Scooter & E-Bike App (Google Play)

Flutter, Dart, GPS, Real-Time Tracking, QR Scanning

- Worked as a Flutter Developer end to end on a published shared mobility app for finding nearby vehicles, unlocking them by QR code, and riding.
- Covered the rider experience across the live vehicle map, vehicle details, QR unlock, in-app support, and English and Arabic language options.

Xtrafyl — On-Demand Car Services (Customer & Driver Apps, Android & iOS)

Mobile Apps, Maps & Navigation, Real-Time Job Status

- Developed the customer app for booking towing, fuel delivery, EV charging, jump starts, tire repair, and car washes from nearby providers.
- Developed the driver app for assigned jobs, navigation to customers, job sessions, and step-by-step status updates.

Realtime Chat

Flutter, Supabase Auth, Supabase Realtime, Postgres, Bloc

- Built a chat app with room creation, email and password sign-in, and live message streams stored in Postgres.

Pipeline API

Python, FastAPI, Pydantic

- Built an API that validates pipeline graphs and uses Kahn's algorithm to confirm they contain no cycles.

Personal Portfolio

Flutter, Dart, Java

- Designed and developed a responsive portfolio website showcasing projects and technical skills.
- Implemented maintainable UI and responsive navigation; debugged and tested with Flutter DevTools.

Sorting Visualizer

Flutter, Dart, Algorithms & Animations

- Developed an interactive sorting visualization tool with real-time animated data movement.
- Implemented Bubble, Selection, Insertion, Merge, and Quick Sort with step-by-step transitions.

EDUCATION & ACHIEVEMENTS

Poornima College of Engineering, Jaipur
B.Tech — Information Technology & Engineering | 2020–2024

Tagore Public School, Jaipur
CBSE Class 12 | 2020 • CBSE Class 10 | 2018

Relevant Coursework
Data Structures & Algorithms · DBMS · Machine Learning · Artificial Intelligence

Achievements
Solved 300+ DSA problems · Awarded “Outstanding Enthusiasm & Dedication” at Emizen Tech
